4KS

The outstanding system for maximum security

4KS keys | intelligent technology with functional design

The patented springless curve technology of 4KS is suitable for the toughest conditions. The reversible key offers convenient key insertion and thanks to the overlapping curves on the key, we guarantee maximum security.

Added bonus: You can lock all your doors with just one 4KS key. Whether it's the entrance, cellar, garage or annex.

EVVA | unique security

EVVA is constantly investing in research and is always working to develop new key technologies. This means that EVVA consistently meets the increasing requirements for security and organisation.

Increased security with the EVVA security card and patents

The genuine 4KS key is produced exclusively by EVVA. Copy keys, additional cylinders and lock charts are only available at authorised EVVA partners with the relevant proof of legitimacy, i.e. the EVVA security card. EVVA is entitled to take legal actions in the event of patent violations.

More protection | in any situation

The innovative technology of the 4KS cylinder offers long lasting protection against illegal opening methods. The picking and scanning protection make it virtually impossible to scan the cylinder in order to make a copy key. The springless function also offers protection against impact picking. Carbide metal elements and a body drilling protection offer effective protection against drilling, pulling and snapping attempts.

EVVA
access to security

Choose ergonomic design keys
4KS keys are optionally available as ergonomic high-grade design keys. The attractive design is available in many different colours.

Benefits

- Easier to distinguish the keys
- Simple management of master key systems thanks to colour allocation
