ICS

Strong and reliable

ICS. Strong and reliable

Thanks to ICS you boost the convenience of your system, can rely on planning and investment security as well as the durability and long service life of the system.

ICS is a durable reversible key system with high expansion capabilities, so that future master key system extensions can be planned ahead. Be it office buildings, schools or student residences, ICS will convince you.

ICS benefits at a glance

- › Increased copying protection
 - › For complex master key system structures
 - › High levels of protection against burglary
 - › Patent protection until 2029
-

ICS. One system, many details

ICS offers different locking technologies for high protection: The durable length profile and the distinctive track system with internal recesses. The scanning takes place in five tracks through 13 spring-loaded locking elements and the durable length profile. As a reversible key system, ICS ensures comfort: The key's thickness of 3 mm and the high-quality nickel silver alloy make it convenient, durable and resistant to wear.

Practical, handy and appealing

Optionally, ICS keys are available in a range of colours. The colour coding helps to easily distinguish between keys.

All-round protection

Copy keys, additional cylinder and lock charts are available from authorised EVVA Partners but only with corresponding proof of legitimacy, the EVVA security card.

Benefit from the security features

The reliable ICS cylinder technology offers lasting protection against illegal opening methods:

Drilling protection

Plug pulling protection

Unique EVVA service

Since 1919, EVVA services have been focused on customer benefits. This has resulted in market-based products, the best product and consulting service as well as an outstanding locking system expertise.

Locking systems by professionals

Master key systems define who has access to which facilities. EVVA provides comprehensive master key system and access control system expertise as well as high-performance locking systems.

Mechanical and electronic locking systems
