MCS

The innovative system for unique security

MCS keys | Magnet technology in elegant design

EVVA is the only manufacturer, that produces a high-security magnetic locking system such as the MCS. This is particularly important in buildings containing highly sensitive and irreplaceable objects. Despite the versatile technology, the system is highly wear resistant. The permanent magnets also have a long durability under extreme conditions.

Added bonus: You can lock all doors with just one MCS key. Whether it's the entrance, cellar, garage or annex.

EVVA | unique security

EVVA is constantly investing in research and is always working to develop new key technologies. This means that EVVA consistently meets the increasing requirements for security and organisation.

Increased security with the EVVA security card and patents

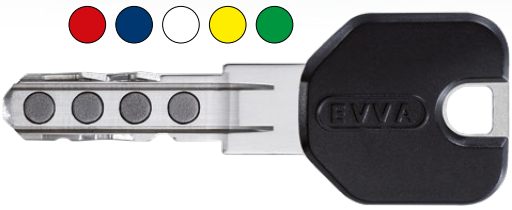

The genuine MCS key is produced exclusively by EVVA. Copy keys, additional cylinders and lock charts are only available at authorised EVVA partners with the relevant proof of legitimacy, i.e. the EVVA security card. EVVA is entitled to take legal actions in the event of patent violations.

More protection | in any situation

The innovative technology of the MCS cylinder offers long lasting protection against illegal opening methods. The picking and scanning protection make it impossible to scan the magnetic coding. The carbide metal elements in the cylinder plug offer effective protection against drilling and provide a high level of protection against plug pulling and snapping attempts.

EVVA
access to security

Choose the ergonomic design key bow
MCS keys are optionally available with the new, ergonomic high-quality design key bow. The attractive design is available in many different colours.

Benefits
- Easier to distinguish the keys
- Simple management of master key systems thanks to colour allocation
- High quality for improved haptics

Great for your security

Protect what is important to you. Preferably with the security solutions from EVVA.
You benefit from decades of experience: these solutions offer outstanding quality and innovative technology.

EVVA offers highest security. For example with MCS – the Magnetic Code System. Magnetic technology unique all over the world for the highest security and demanding requirements.

The benefits of MCS at a glance

- One key for everything
- Unique magnet technology
- Highest key copying protection
- High demands on perfection and security
