

AirKey

Simply smart

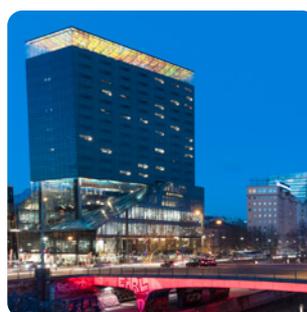

AirKey. Simply smart

With AirKey the smartphone is the key. It increases your levels of security, flexibility and gives you full control over your doors. But what do you need? With an AirKey cylinder, a smartphone as well as Internet access you will be able to send your keys by text message (SMS) and to manage your electronic locking system online. Well, if that's not smart!

The electronic locking system is a story of worldwide success

Thanks to AirKey key, handovers and complex key management are a thing of the past. For this reason, many co-working space operators and infrastructure facilities as well as mobile service providers rely on AirKey and benefit from increased security and flexibility.

NEW | DE

Just as dynamic as customers' needs

AirKey is the electronic locking system for a new, mobile generation and a response to the dynamics of modern working worlds as well as our private lives. Flexibly send keys to smartphones via the Internet and benefit from maximum security standards and many smart software features.

George sends keys using the online administration

George manages an advertising agency. His team consists of a pool of different freelancers. Thanks to AirKey he saves himself from having to deal with tedious key management.

Encrypted + secure as per online banking standards

With AirKey authorisations are always saved in encrypted format in the online administration. The AirKey app on smartphones can also be secured with an individual PIN code.

KeyCredits – time-based credit and quantity credit

You require KeyCredits to issue new keys and change authorisations of existing keys.

KeyCredits 10, 50, 100 or KeyCredit Unlimited

One KeyCredit is required to create and change access authorisations. Unlocking doors and deleting access authorisations is free of charge. A choice of credit amounts is available – 10, 50, or 100 KeyCredits or time credits – KeyCredit unlimited for one or three years.

Sophie receives the key on her smartphone

Sophie is George's new freelancer. She has just arrived and receives the key to the agency in a push notification. She received the prompt to install the AirKey app by SMS text message.

Sophie has no trouble finding George's agency and uses her smartphone to unlock the door

Thanks to the cylinder's GPS tagging Sophie easily found George's agency. The cylinder now identifies her smartphone as a key and authorises her to open the key.

AirKey meets EU Data Protection Directive

AirKey was developed as the most data-protection-friendly access system together with the certified data protection expert Dr Christof Tschohl. Please do not hesitate to contact us if you have any questions about details.

Increased data protection thanks to the dual control principle

Event logs can only be viewed if a second admin grants the requester access with a TAN.

AirKey app and online administration

Many smart features

The AirKey app and the online administration include many smart features that make your professional and private lives easier.

Send a Key

Simply send the key including a personal text message (max. 150 characters) via a push message.

Geotagging

Smartphones know where locking system components are located and guide the way using the navigation app.

Office mode

Fully or semi-automatic office mode at certain doors and at certain times. Automatically takes into account public holidays as well as summer and winter time.

Component sharing

Leave the management of locking system components to tenants, e.g. in shared offices.

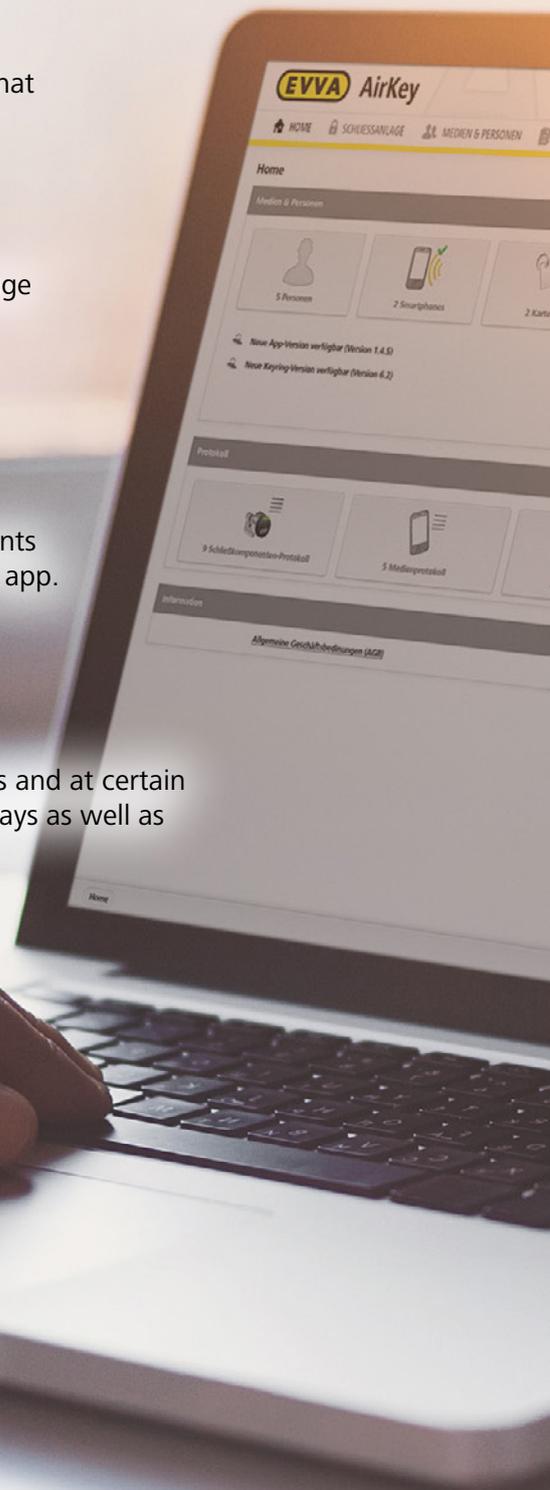

Multi-administration

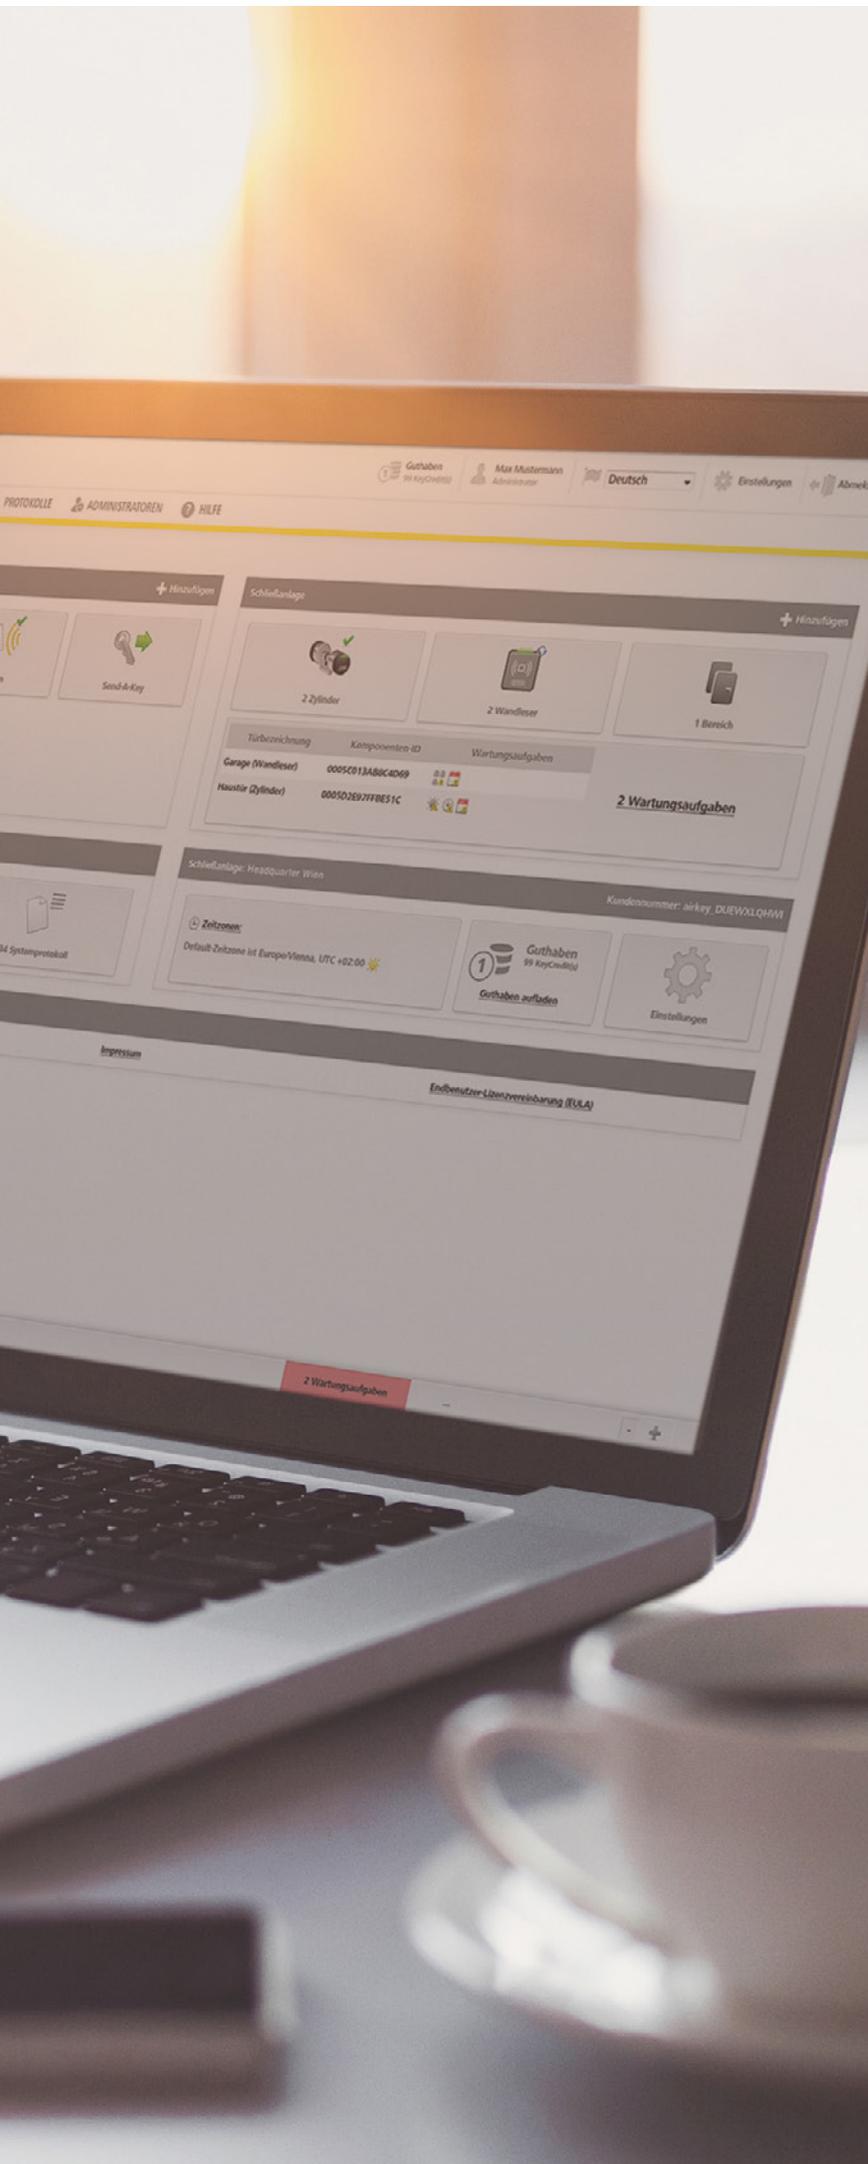

Multiple admins and sub-admins with restricted rights can separately manage company locations.

AirKey Cloud Interface

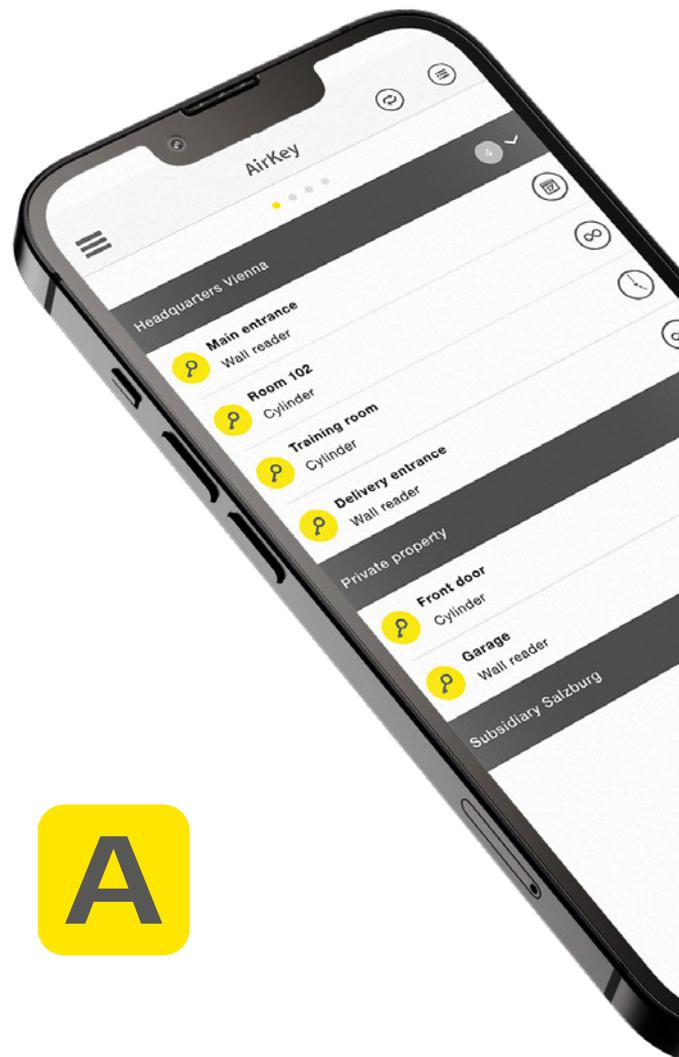

The AirKey Cloud Interface (API) allows you to control particular AirKey functions with your own software.

Online administration Free and easy

Online administration is the control centre to create new keys or block existing keys. It is free of charge, quickly to set up and easy to operate.

Free App for iPhone & Android

Simple and intuitive, that's the AirKey app. It turns a smartphone into one or more keys for different systems. It also creates and updates other access media, such as cards or key tags. It additionally provides high levels of protection thanks to an optional PIN code.

AirKey handles every situation perfectly

Be it sliding doors, archiving containers, delivery boxes or simple metal frame doors in the office, thanks to AirKey you have a firm grip on security.

AirKey cylinder

Thanks to its modular design the cylinder is easy to install and retrospectively easy to adapt in length.

AirKey padlock

Suitable for barriers, depots and archiving containers in stationary applications.

AirKey cam lock

This cylinder completes your AirKey system thanks to its suitability for post boxes and filing cabinets.

AirKey wall reader

Electronic locking elements, such as sliding doors, are actuated using the AirKey wall reader.

No smartphone available?

The AirKey system is also suitable for use with key tags, cards or combi keys.

Bluetooth
Hands-free opening using Bluetooth.

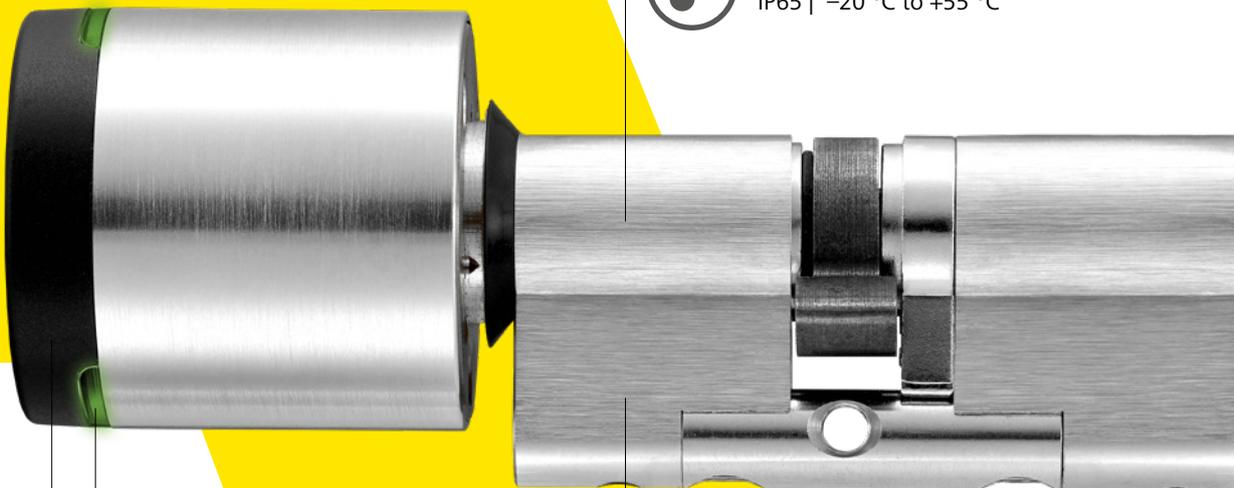

NFC technology
Unlock over short distances.
With Android smartphones only.

Long battery life
Up to 30,000 access events

Suitable for use outdoors
IP65 | -20 °C to +55 °C

Audible signals

Visual signals

Drilling and plug pulling protection
The mechanical quality is outstanding and provides high degrees of burglary protection.

Easy installation and adaptation
thanks to modular design

Unique EVVA service

Since 1919, EVVA services have been geared towards customer benefits. This has resulted in market-based products, the best product and consulting service for customers and partners as well as a master key system expertise that boosts customer convenience and gives operators a competitive, economic edge.

Master key systems from professionals

Master key systems define who has access to which facilities. EVVA not only offers comprehensive expertise in planning master key systems, but the company's range also includes high-performance master key systems able to illustrate any level of complex authorisation structures.

Your EVVA Partner portal

Our Partner portal provides everything you as EVVA Partners need as part of your everyday activities: price lists, catalogues, data sheets and the option to sign up to training sessions.

Mechanical and electronic systems

EVVA is one of the few manufacturers to develop and produce electronic and mechanical systems in Vienna to combine the systems in master key systems around the world depending on customer demands.

Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.

Innovation made in Austria
