Xesar

Simply versatile

Xesar. Simply versatile

Control, security and flexibility merged in an innovative, electronic locking system – that's Xesar. Be it residential developments, educational facilities or office buildings, Xesar is simple and secure to manage. You determine whether to manage the system within a locally installed network or via the cloud.

Xesar top features

- › Multi-user operation for user roles
 - › Versatile product range
 - › Appealing payment models
 - › Flexible system extensions
-

The electronic locking system is a worldwide success story.

Be it in residential properties, companies or public institutions – many people come in and out every day. In this process, it is particularly important to quickly, easily and efficiently assign access authorisations. Thanks to Xesar it's very simple. The system supports you with many user-friendly software features for more control and security.

Liese-Prokop private school | AT

Hamburg Port Authority | DE

One system, many options

Individual Xesar components are synchronised with the software using the Xesar tablet to commission the Xesar system. Access authorisations are imported to identification media at the coding station. Within the virtual network the identification media in circulation distribute the security information (blacklist) throughout the facility.

Xesar access components

Xesar components are programmed via the Xesar software

Xesar identification media

Users identify themselves at doors with a card, key tag or combi key

Virtual network

The Xesar virtual network uses the issued identification media to exchange information between software and doors to always keep the system up to date.

Xesar tablet

Wireless configuration and maintenance of multiple Xesar components

Xesar software

The Xesar software is used to comprehensively manage the system.

Controls | LAN

Xesar online wall readers

These components offer real-time door monitoring, remote opening and represent the security interface within the virtual network.

KeyCredits – the choice is yours

Two credit models are available for the operation of the Xesar system

KeyCredits 10, 50, 100

Do you operate a small system or a system that is only affected by very few changes to authorisations? Then select KeyCredits variants with quantity-based credit, i.e. 10, 50 or 100 credits. You pay one KeyCredit per access authorisation or per change.

KeyCredit Xesar Lifetime

You operate a large system subject to frequent changes to authorisations? Then you should opt for the KeyCredit Xesar Lifetime time-based variant. Without any time or quantity limits you can grant or change an unlimited amount of authorisations.

Xesar software

Flexible – simple – secure

Xesar makes your professional life easier. Here are all the highlights of the Xesar software at a glance.

Dashboard and user roles

Tasks, important information, warnings - these are all displayed directly on the dashboard so that you don't miss a thing. In addition, the user interface can be customised according to the user role.

Shop mode

For anyone who is not always bang on time. The shop mode security feature starts office mode only after the door has been opened for the first time.

MQTT interface

Xesar is compatible with your alarm, smart building, time tracking and HR data systems. The MQTT interface makes it possible.

Multi-user

Several users can manage the Xesar system simultaneously. You can issue media, change authorisations or open online doors remotely.

Additional software features

- › Dashboard with operating tiles for a secure system overview
- › Automatic system check during initial installation and system start-up
- › Versatile filters with preset function
- › Delete key function after blocked identification media
- › List export to XLS, CSV

Versatile product range

Whatever you want, Xesar can deliver

Thanks to the wide product range Xesar can not only be used in doors on the inside and outside, for turnstiles and emergency exit doors, but the system is even suitable for server cabinets and roller shutter gates.

Xesar escutcheons

All-rounders with elegant design – that's the Xesar escutcheon. Suitable for solid or metal frame doors as well as doors with panic bars.

Xesar cylinders

The cylinders are suitable for outdoors and indoors and provide all essential security features. Their modular design enables on-site elongation adaptation.

Xesar handles

Handles are ideal for use on internal doors. Various finishes and handle shapes offer a solution for any architectural requirements.

Xesar wall readers

Xesar wall readers are suitable for indoor and outdoor use. As online wall readers they can, for instance, be operated remotely by porters to grant access to suppliers.

Xesar padlocks

Protects archiving facilities, server cabinets or roller shutter gates indoors and outdoors.

Xesar cam locks

Suitable for post boxes or filing cabinets these cylinders complete your Xesar system.

Xesar identification media

Key tags and combi keys are available in a range of different colours.
