

Three central questions surrounding master key systems

EVVA master key systems. Our skills – your benefits

What is a master key system?

What are the benefits of a master key system?

How do I benefit from a master key system?

What is a master key system?

A master key system is a combination of cylinders and keys

It specifies who has access to which facilities

It organises as well as facilitates organisational processes

More control
Users, facilities and areas are brought into context with each other

Creating a locking chart

Mechanical and electronic systems can be combined in one facility

Clear hierarchies – the manager can unlock all doors, employees only have access to selected doors

Furniture cylinders, cam locks or switch cylinders can all be integrated into EVVA master key systems

EVVA systems with high calculation capacities implement highly complex access hierarchies

Example of a master key system for organisations

Represents the corporate structure and facilitates management

One key can unlock all cylinders depending on the access authorisations

Master key systems for organisations

Master key systems for residential complexes

Individual access authorisations for service engineers can be integrated

One single key opens all doors with access authorisations

Boosts residents' convenience and simplifies management

Your benefits

- Facility management becomes more straightforward
- You benefit from EVVA master key system expertise
- You are provided with customised access solutions
- You benefit from five mechanical systems that can all be combined with EVVA electronic systems
