

access to security

4KS

More robust. Stronger. More secure.

Cylinders for every door requirement

4KS offers you all the cylinder types you need in your home.

Double cylinder

are suitable for interior and exterior doors and can be equipped with numerous versions and options.

Half cylinder

suitable for barriers, key switches, lifts and numerous other situations.

Padlock

efficiently integrate external objects into the access system

Thumbturn cylinder

allows convenient opening and closing without keys.

4KS. More robust. Stronger. More secure.

You can always rely on 4KS. Thanks to its high level of resilience, the system also locks and unlocks in the toughest conditions. Even after years, it works like it did on the first day. This makes 4KS your first choice for the toughest conditions – at high altitudes or in production facilities subject to high amounts of dirt. What's more, 4KS also offers extensive upgrade opportunities which enables the implementation of highly complex master key systems.

The benefits of 4KS at a glance

- › Resilient and extremely durable
 - › For highly complex master key systems
 - › Springless technology
 - › Patent protection until 2037 at the latest*
-

4KS. For the toughest conditions

The 4KS system consists of a few individual parts and is springless, therefore maintenance-free and extremely durable even in continuous use. Whether high up on the mountain or in production facilities with high levels of dirt, 4KS is made for the toughest jobs.

Smooth-action key

Thanks to the curves, the key is also extremely easy to insert and turns easily and quietly in the cylinder.

The option for even more security

External key override or thumbturn cylinder. With the external key override option, it doesn't matter whether a key is inserted inside or not. You can always lock the door from the outside. A thumbturn cylinder also offers this security.

All-round protection

Copy keys, additional cylinders and lock charts are available from authorised EVVA Partners only upon providing proof of legitimacy, i.e. the EVVA security card.

Benefit from the security features

The reliable technology of the 4KS cylinder offers lasting protection against illegal opening methods.

4KS. Combined with electronic access systems

4KS can be perfectly combined with EVVA electronic access systems. Electronic access systems are primarily used on the perimeters of a facility and where event logs and time-limited access are important. Electronic and mechanical access components can be locked with just one key: the combi key.

Practical, handy and appealing
MCS keys are available in many different colours. The colour coding helps to easily distinguish between keys.

Innovation made in Austria.

Trust a family-owned business that has been researching, developing and producing for 100 years and operates in a respectful and cooperative way.
