

# ICS

Strong and reliable

## ICS. Strong and reliable

With ICS, you can enhance the comfort of your installation, maintain planning and investment security and rely on the robustness and durability of the system. ICS is a durable reversible key system with such a high calculation capacity that reserves for locking systems can already be taken into account during the planning phase. Be it office buildings, schools or student residences, ICS does it all..

---

### ICS benefits at a glance

- › Enhanced data protection
  - › For highly complex access systems
  - › High levels of protection against burglary
  - › Patent protection until 2038 at the latest
- 

## The access system for complex master key systems

ICS is ideal for complex master key systems and a large number of different user groups. For example, in office buildings, hotels, associations, student residences and nursing homes. In cooperation with qualified partners, EVVA has been providing security technology for a hundred years.

## Strong and reliable

ICS offers different locking technologies for high protection: the durable length profile and the distinctive track system with internal recesses. The scanning takes place in 5 tracks through 13 spring-loaded locking elements and the durable length profile. As a reversible key, ICS's thickness of 3 mm and the high-quality nickel silver alloy make it convenient, durable and wear-resistant.

## Practical, handy and appealing

ICS keys are optionally available in many different colours. The colour coding helps to easily distinguish between keys.

## All-round protection

Copy keys, additional cylinders and lock charts are available from authorised EVVA Partners only upon providing proof of legitimacy, i.e. the EVVA security card.

## Benefit from the security features

The reliable ICS cylinder technology offers lasting protection against illegal opening methods.

# ICS. Cylinders for every door requirement

ICS cylinders serve all master key system access situations due to their numerous features, versions and options. In this way, access to rooms and floors, access to cabinets and display cases, or the activation of barriers or other electronic installations can be clearly structured. This means even greater comfort and security.

## **Double cylinder**

are suitable for interior and exterior doors and can be equipped with numerous versions and options.

## **Furniture cylinder**

make sure that important documents are securely archived.

## **Thumbturn cylinder**

allows convenient opening and closing without keys.

### **Switch cylinders**

control electronic systems, such as automatic sliding doors.

### **Half cylinder**

suitable for barriers, key switches, lifts and numerous other situations.

### **Cam lock**

for mailbox systems and for secure storage in showcases and display cabinets.

### **Switch cylinder**

operate control elements such as those in lift systems.

# ICS. Combined with electronic access systems

ICS can be perfectly combined with EVVA electronic access systems. Electronic access systems are primarily used on the perimeters of a facility and where event logs and time-limited access are important. Electronic and mechanical access components can be locked with just one key: the combi key.

**Xesar cylinder**  
for common areas

**Combi key**  
for all rooms

**EMZY motorised cylinder**  
for bicycle storage rooms

## ICS. Security you can feel.

A sturdy, strong key and cylinder ensure tangible security. The key is ergonomically shaped and very comfortable despite its thickness.

### **Well integrated security**

With a thickness of 3 mm, the key is fully stable and resistant to bending. With the concealed recesses on the inside, illegal production using the 3D printing process is almost impossible.

# Unique EVVA service

Since 1919, EVVA services have been geared towards customer benefits. This has resulted in market-based products, the best product and consulting service for customers and partner as well as access system expertise that boosts customer convenience and gives operators a competitive, economic edge.

## Access systems from professionals

Access systems define who has access to which facilities. EVVA not only offers comprehensive expertise in planning access systems, but the company's range also includes high-performance access systems that are able to accommodate any level of complex authorisation structures.

## Your EVVA Partner portal

Our Partner portal provides everything you as EVVA Partner need as part of your everyday activities: Price lists, catalogues, data sheets, and the option to sign up for training sessions.

## Mechanical and electronic access systems

Apart from EVVA, only a few manufacturers develop and produce their own mechanical and electronic systems in Vienna. EVVA customises these systems to create access solutions for use anywhere in the world

## Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.

Innovation made in Austria.

Trust a family-owned business that has been researching, developing and producing for 100 years and operates in a respectful and cooperative way. EVVA – the European leader in mechanical and electronic access systems!
