Xesar

Simply versatile

Xesar. Simply versatile

Control, security and flexibility merged in an innovative, electronic access system – that's Xesar. Whether for residential developments, educational facilities or office buildings, Xesar can be simply and securely managed. You determine whether to manage the system within a locally installed network or via the cloud.

Xesar top features

- › Multi-user operation with user roles
 - › Wide range of products
 - › Appealing payment models
 - › Send a Key
-

The world's most successful electronic access system

Be it in residential properties, companies or public institutions – many people come in and out every day. In this process, it is particularly important to quickly, easily and efficiently assign access authorisations. Thanks to Xesar it's very simple. The system supports you with many user-friendly Xesar software features for greater control and security.

One system, many options

Individual Xesar components are synchronised with the software using the Xesar tablet to commission the Xesar system. Smartphones are authorised directly by SMS, all other access media are written with access authorisations via the coding station or the online wall reader. Within the virtual network, the access media in circulation distributes the security information (blacklist) throughout the facility.

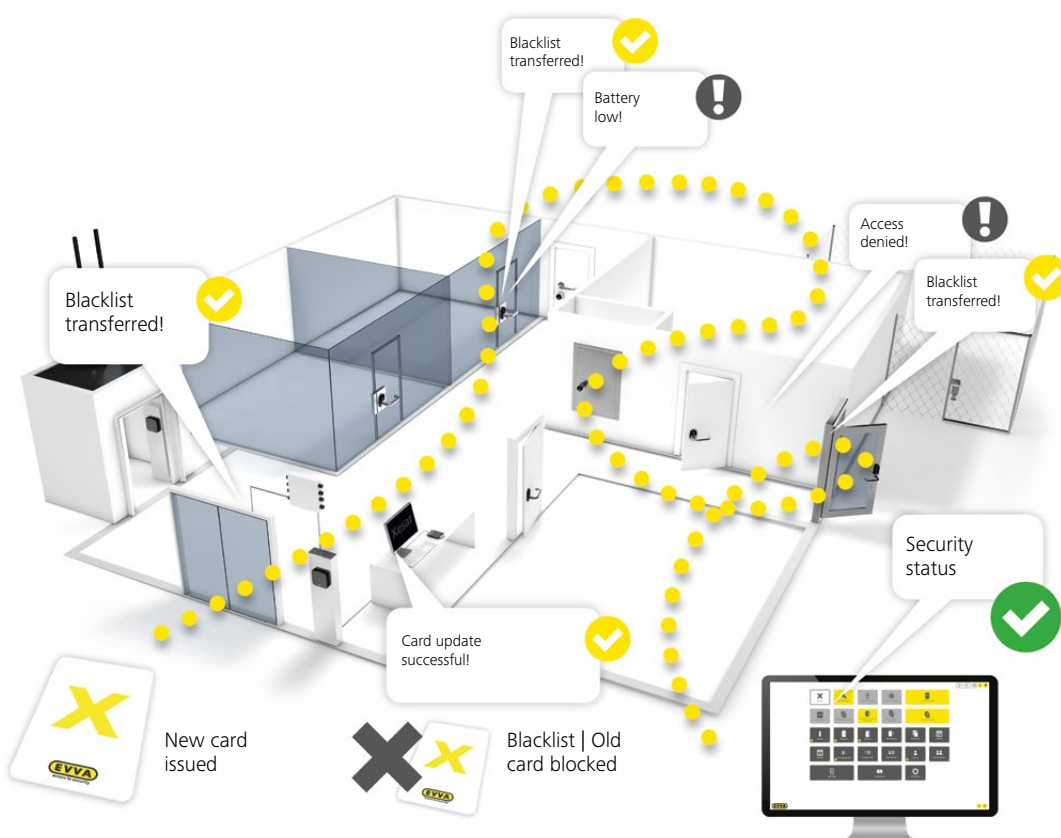

Access components

They are programmed and managed using the Xesar software.

Xesar access media

Persons can identify themselves at doors via a smartphone, an access card, key fob or combi key.

Virtual network

The Xesar virtual network uses the access media in circulation to exchange information between the Xesar software and doors and thus keeps the system up to date at all times.

Xesar tablet

Wireless configuration and maintenance of multiple Xesar components

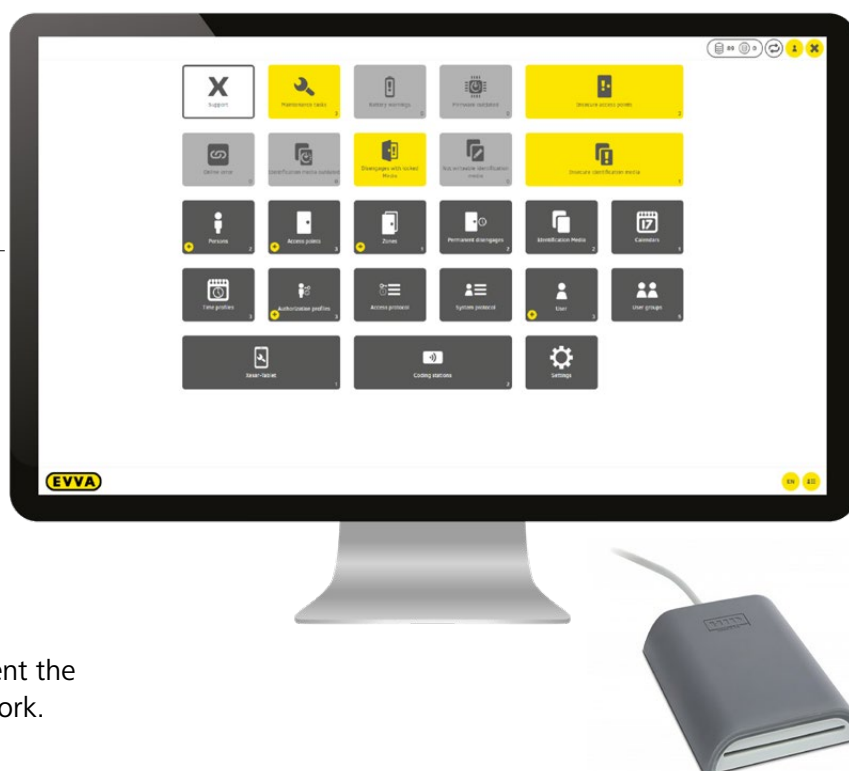

Xesar software

Xesar software is used to comprehensively manage the system.

Controls | LAN

Xesar wall reader

These components offer real-time door monitoring, remote opening and represent the security interface within the virtual network.

KeyCredits – the choice is yours

Two credit models are available for the operation of the Xesar system

KeyCredits 10, 50, 100

Do you have a small access system and only need to make a few changes to authorisations? Then select the number of KeyCredits you want from the quantity quotas of 10, 50 or 100. One KeyCredit is paid per access authorisation or for one amendment.

KeyCredits Xesar Lifetime

You have a large access control system and frequently make changes to authorisations? Then the best option for you is our KeyCredit Xesar Lifetime time-based variant. You can grant or change authorisations with no time limit or restriction on the number of authorisations.

The Xesar software.

Flexible – simple – secure.

Xesar makes your work easier. Here are all the highlights of the Xesar software at a glance.

Dashboard and user roles

Tasks, notices, and warnings - these are displayed directly on the dashboard so that nothing is overlooked. In addition, the user interface can be customised according to the user role.

Xesar app

Access authorisations can be sent directly to smartphones. This turns any smartphone into another Xesar access medium.

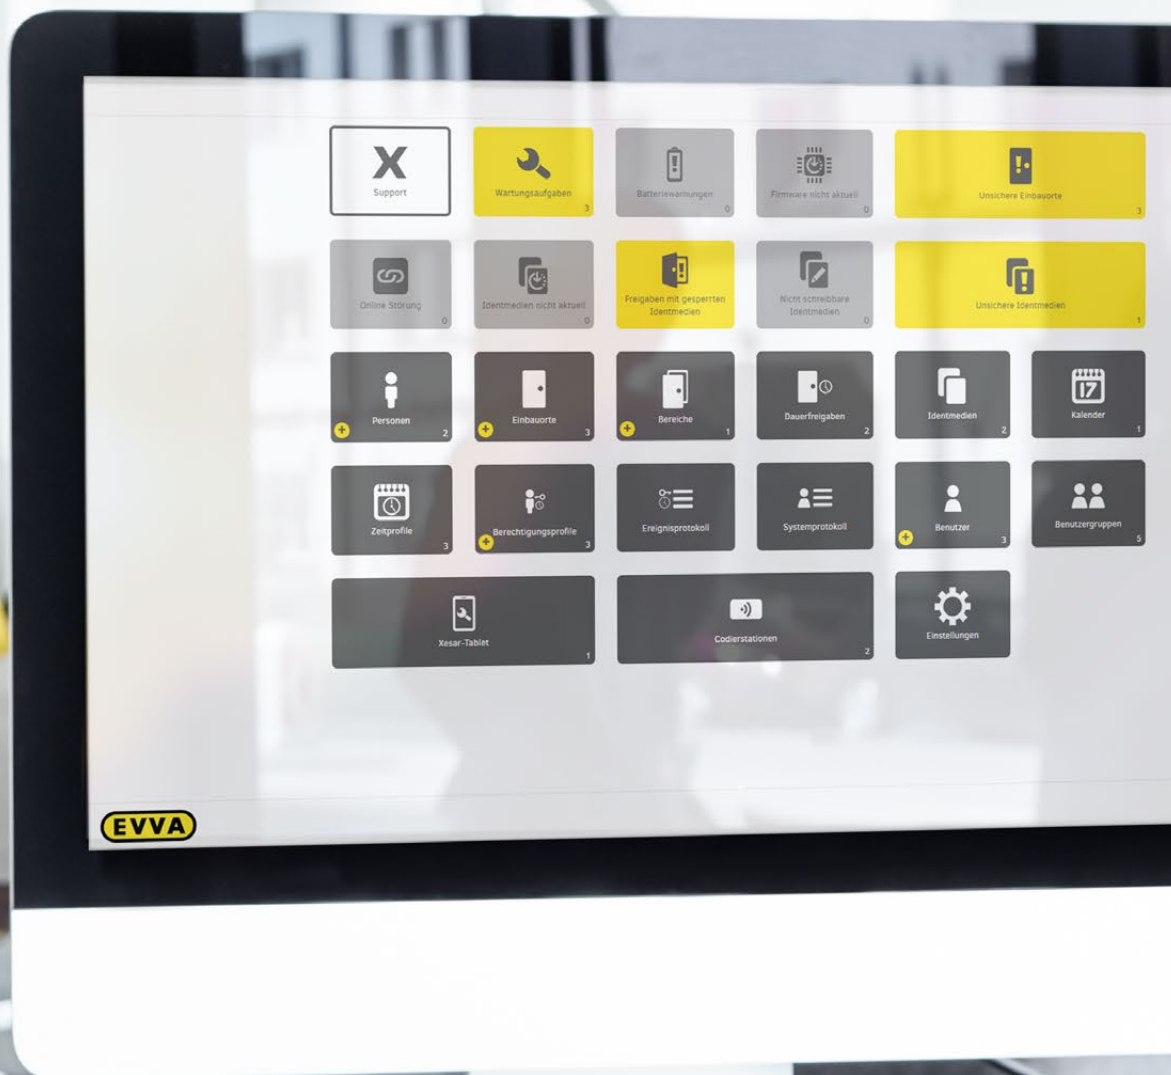

MQTT interface

Xesar is compatible with other systems, your alarm, smart building, time recording, and personnel data systems. The MQTT interface makes it possible.

Multi-user

Several users can manage the Xesar system simultaneously. You can issue media, change authorisations or open online doors remotely.

Additional Xesar software features

- › Dashboard with operating tiles for a secure system overview
- › Automatic system check during initial installation and system start-up
- › Versatile filters with preset function
- › Delete key function after blocked identification media
- › List export to XLS, CSV

A diverse product world. Xesar can deliver to meet your needs

Thanks to the wide product range Xesar can not only be used in doors on the inside and outside, for turnstiles and emergency exit doors, but the system is even suitable for server cabinets and roller shutter gates.

Xesar escutcheons

All-rounders with elegant design – that's the Xesar escutcheon. Suitable for solid or metal frame doors as well as doors with anti-panic bars

Xesar cylinders

The cylinders are suitable for outdoors and indoors and provide all essential security features. The modular design allows for length adjustment at the installation site.

Xesar handles

Handles are ideal for use on internal doors. Various finishes and handle shapes offer a solution for any architectural requirements.

Xesar wall readers

Xesar wall readers are suitable for indoor and outdoor use. As online wall readers they can, for instance, be operated remotely by porters to grant access to suppliers.

Xesar padlocks

Secures archiving facilities, server cabinets, or roller shutter gates indoors and outdoors.

Xesar cam lock

Suitable for post boxes or filing cabinets these cylinders complete your Xesar system.

Xesar access media

Key tags and combi keys are available in many different colours.

Unique EVVA service

Since 1919, EVVA services have been geared towards customer benefits. This has resulted in market-based products, the best product and consulting service for customers and partner as well as access system expertise that boosts customer convenience and gives operators a competitive, economic edge.

Access systems from professionals

Access systems define who has access to which facilities. EVVA not only offers comprehensive expertise in planning access systems, but the company's range also includes high-performance access systems that are able to accommodate any level of complex authorisation structures.

Your EVVA Partner portal

Our Partner portal provides everything you as EVVA Partner need as part of your everyday activities: Price lists, catalogues, data sheets, and the option to sign up for training sessions.

Mechanical and electronic access systems

Apart from EVVA, only a few manufacturers develop and produce their own mechanical and electronic systems in Vienna. EVVA customises these systems to create access solutions for use anywhere in the world

Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.

Innovation made in Austria.

Trust a family-owned business that has been researching, developing and producing for 100 years and operates in a respectful and cooperative way. EVVA – the European leader in mechanical and electronic access systems!
