access to security

Xesar. Simply versatile

Control, security and flexibility merged in an innovative, electronic access system – that's Xesar. Whether for residential developments, educational facilities or office buildings, Xesar can be simply and securely managed. You determine whether to manage the system within a locally installed network or via the cloud.

Xesar top features

- Multi-user operation with user roles
- Wide range of products
- Appealing payment models
- Send a Key

One system, many options

Individual Xesar components are synchronised with the software using the Xesar tablet to commission the Xesar system. Smartphones are authorised directly by SMS, all other access media are written with access authorisations via the coding station or the online wall reader. Within the virtual network, the access media in circulation distributes the security information (blacklist) throughout the facility.

Access components
They are programmed and managed using the Xesar software.

Xesar access media
Persons can identify themselves at doors via a smartphone, an access card, key fob or combi key.

Simply versatile
Two credits models are available for Xesar operation.

KeyCredits 10, 50, 100
Do you have a small access system and only need to make a few changes to authorisations? Then select the number of KeyCredits you want from the quantity quotas of 10, 50 or 100. One KeyCredit is paid per access authorisation or for one amendment.

Xesar tablet
Wireless configuration and maintenance of multiple Xesar components

Xesar software
Xesar software is used to comprehensively manage the system.

Controls | LAN

Xesar wall reader
These components offer real-time door monitoring, remote opening and represent the security interface within the virtual network.

KeyCredits Xesar Lifetime
You have a large access control system and frequently make changes to authorisations? Then the best option for you is our KeyCredit Xesar Lifetime time-based variant. You can grant or change authorisations with no time limit or restriction on the number of authorisations.

The Xesar software.
Flexible – simple – secure

Dashboard and user roles
Tasks, notices, and warnings - these are displayed directly on the dashboard so that nothing is overlooked. In addition, the user interface can be customised according to the user role.

Xesar app
Access authorisations can be sent directly to smartphones. This turns any smartphone into another Xesar access medium.

MQTT interface
Xesar is compatible with other systems, your alarm, smart building, time recording, and personnel data systems. The MQTT interface makes it possible.

Multi-user
Several users can manage the Xesar system simultaneously. You can issue media, change authorisations or open online doors remotely.

access to security

Xesar handles

Handles are ideal for use on internal doors. Various finishes and handle shapes offer a solution for any architectural requirements.

Xesar wall readers

Xesar wall readers are suitable for indoor and outdoor use. As online wall readers they can, for instance, be operated remotely by porters to grant access to suppliers.

Xesar padlocks

Secures archiving facilities, server cabinets, or roller shutter gates indoors and outdoors.

Xesar cam lock

Suitable for post boxes or filing cabinets these cylinders complete your Xesar system.

Unique EVVA service

Since 1919, EVVA services have been geared towards customer benefits. This has resulted in market-based products, the best product and consulting service for customers and partner as well as access system expertise that boosts customer convenience and gives operators a competitive, economic edge.

Access systems from professionals

Access systems define who has access to which facilities. EVVA not only offers comprehensive expertise in planning access systems, but the company's range also includes high-performance access systems that are able to accommodate any level of complex authorisation structures.

Mechanical and electronic access systems

Apart from EVVA, only a few manufacturers develop and produce their own mechanical and electronic systems in Vienna. EVVA customises these systems to create access solutions for use anywhere in the world

Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.

Innovation made in Austria.

Trust a family-owned business that has been researching, developing and producing for 100 years and operates in a respectful and cooperative way. EVVA – the European leader in mechanical and electronic access systems!
